

SOMNOmedics SLEEP Dinner Event 2012 in Boston was a huge success

This years SOMNOmedics Dinner Event during the SLEEP 2012 Meeting in Boston came out as a great success for SOMNOmedics. Around 20 of SOMNOmedics customers and interested SLEEP attendees joined our team for a dinner and discussions on the SOMNOmedics products and methods.

Along with our other guests we were very happy to welcome one of the luminaries in sleep medicine and the pioneer in sleep apnea diagnosis, Christian Guilleminault.

After a quick overview on SOMNOmedics product portfolio and business areas, we focused on SOMNOmedics innovative and patented method of continuous, non-reactive and non-invasive blood pressure recording, which uses the pulse transit time to determine the patients blood pressure. Thanks to the non-reactive method that goes without cuff for the blood pressure measurement but uses a small finger clip and an ECG, the patient's sleep is not disturbed during the night. This allows unaltered and continuous blood pressure recordings during the nights and gives the physician an idea about the cardiovascular risks of the patient suffering from sleep apnea or other sleep related diseases.

Christian Guilleminault, who was the first to discover the correlation of cardiovascular diseases, Hypertension and sleep apnea participated actively in the subsequent discussion on the topic and was able to contribute some high-ranking feedback thanks to his status as an expert in the field.

The SOMNOmedics team was also present during the SLEEP 2012 show. Thanks to our biggest booth in SOMNOmedics history we were able to demonstrate our growing position in the USA and gain a lot of additional attendance both from existing as well as future customers.

In follow up to the APSS Dinner event as well as the APSS SLEEP 2012 show we would like to thank all the distributors and customers of SOMNOmedics who attended the successful and delightful meeting and wish for a great ongoing partnership and cooperation with everybody. We very much look forward to next year's meeting in Baltimore!
