Sleepless in Würzburg?

Festive Opening of the new SOMNOmedics Sleep Lab

Unpleasant, long waiting times for a sleep lab recording are an annoyance for the past for patients living in Würzburg and the surrounding area now: The ENT joint practice Dr. Bernhard Roth and Dr. Tim Stelzer has opened a new sleep lab. Located in the center of Würzburg, directly besides the joint practice and the medieval cathedral, the new sleep lab now bridges a gap in medical care for the patients and offers extensive medical service in the whole field of sleep and related areas.

For the facilities of the new sleep lab, Dr. Roth cooperates with the local company SOMNOmedics, which is a leading German manufacturer for sleep diagnostic devices and has fully equipped the establishment with its technology.

The SOMNOmedics sleep lab offers four beds in comfortable single rooms, which allows to record four patients simultaneously. SOMNOmedics state of the art recording devices contribute due to the miniaturized shape of the device to the patient's highest possible comfort. In addition, the patients are allowed to move about freely during the measurement as the devices are portable and patient-worn. All recordings are simultaneously transferred to and controlled on the evaluation PC during the night.

Additionally to the SOMNOmedics sleep lab, SOMNOmedics also runs a therapy center for patients suffering from sleep apnea two floors above. There, patients will receive a comprehensive therapy treatment choosing from a wide range of therapy devices.

In the heart of Würzburg city now a new center for sleep examination has been established, that covers all areas from diagnosis to therapy.

Dr. med. Bernhard Roth (Sleep Lab), Dr. Dr. h.c. Adolf Bauer (Major of the city of Würzburg), PD Dr. med Dr. phil. Anil-Martin Sinha (Sana Clinics Hof) during the opening ceremony of the SOMNOmedics Sleep Lab
