

## SOMNOmedics is 15!

With a big celebration with employees, customers and business partners the SOMNOmedics GmbH celebrated its 15th anniversary in September 2015. At the same time the festival was also the occasion for the inauguration of the new company building.

Dr. Gert K uchler, CEO of SOMNOmedics, stressed in his speech, the last 15 years have "flown by and yet in that time a lot has happened." He founded SOMNOmedics in the year 2000: In the tradition of startups in the first years the company was nothing more than 12m<sup>2</sup> in the utility room of Dr. K uchlers private home. Two moves and a new building in Randersacker later, the company now has over 70 employees from more than 10 nations. The family business is also represented in seven subsidiaries, including in China, the United Arab Emirates and the United States.

The rising demand for SOMNOmedics Sleep Diagnostics "made in Germany" associated with the growing range of products and the increase in sales and number of employees, has now led to the fact that the premises in Randersacker became too small. With the acquisition of the neighboring property this bottleneck has now been overcome. Apart from offices it is planned to build a large training room for customers from around the world there.

During the anniversary celebration, the customers and employees were able to have a first look at the new building. Dr. K uchler today looks back with pride on what has been achieved in the last 15 years: "SOMNOmedics would not be the successful company it is today without its employees and the long-standing customers and companions," said Dr. K uchler "They deserve special thanks for their great commitment, their confidence in us and the long-term cooperation. "

We are looking forward to the next exciting 15 years to come!
